JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

*Report from Tampico—Malarial diseases.*

Assistant Surgeon McClintic reports, August 1, as follows:

Week ended July 30, 1904, six bills of health were issued. Fumigated and certified the British steamship *Mancunia*, July 25, for Newport News; Swedish steamship *Svealand*, July 29, for Perth Amboy; and Norwegian steamship *Farmand*, July 29, for Galveston. Except for a large increase in the number of cases of malarial diseases the health of the port continues about the same, there being no cases of yellow fever reported.

Mosquitoes are abundant and very annoying.

The mortality report for the city of Tampico shows a total of 35 deaths from all causes for the two weeks ended July 30. To intermittent fever were attributed 3 deaths; to cachexia, 2; to cirrhosis of liver, 1; and to tuberculosis, 8.

*Report from Veracruz—Inspection of vessels—Yellow fever.*

Passed Assistant Surgeon Lumsden reports, August 9, as follows: During the week ended August 6, 1904, 6 vessels bound for United States ports were inspected and given bills of health. The following vessels were fumigated with sulphur dioxid and given certificates: August 2, German steamship *Adelheid Menzell*, bound for Mobile; August 4, Norwegian steamship *Norheim*, bound for New Orleans; August 5, British steamship *Capella*, bound for New Orleans; August 6, British steamship *Elswick Grange*, bound for Galveston.

During the week there were recorded in the city of Veracruz 26 deaths (41.6 per 1,000 annual death rate) from all causes, including 1 from pernicious fever and 6 from tuberculosis.

Two new cases of yellow fever were reported during the week, both on August 5. One of the cases occurred at San Juan de Uloa Fortress.

## NICARAGUA.

*Report from Bluefields, fruit port.*

Acting Assistant Surgeon Reilley reports as follows: Week ended July 30, 1904. Present officially estimated population, 4,000; 1 death; prevailing diseases, malarial fever and tuberculosis; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
July 24	Utstein .....	16	0	0	0
27	Condor .....	16	0	0	0
